To Whom It May Concern,

It is my great pleasure to recommend Jonathan Yeung as a beneficial addition to your company. I had the pleasure of working with Jonathan during his time at Innopage, where he worked on several projects including the launch of an NFT marketplace and content management system and the development of a cloud computing infrastructure service.

Throughout his time at Innopage, I was thoroughly impressed with his eagerness and desire to dive deep into new projects. He maintains a positive, can-do attitude in his work that enabled him to perform exceptionally well in every role in the team, and has demonstrated a natural ability to work with others effectively on a variety of projects.

Jonathan is a fast learner and possesses a strong sense of curiosity and desire to learn more. After initially introducing him to our NFT marketplace project, he was able to process and connect the dots quickly, demonstrated his ability as a self-learner to fill in gaps in his knowledge, and didn't hesitate to ask the right questions when needed.

Jonathan also demonstrates strong problem-solving skills which go hand in hand with his ability to come up with creative yet effective solutions. His ability to logically break down problems enabled him to work efficiently and his ability to look at the bigger picture was of especially high value during the early development of our cloud computing infrastructure service.

Jonathan is also extremely well-rounded and possesses extensive knowledge and skills across disciplines. Not only is he a strong programmer and problem solver, but he also shows great expertise with product positioning and has a good sense of design. His extensive software and hardware knowledge also significantly reduced the anticipated workload for our projects.

I am confident that Jonathan's skills and abilities will make him a great asset to your organization. If you have any questions, please do not hesitate to contact me at keith.li@innopage.com. I'd be happy to expand on my recommendation.

Sincerely,

Keith Li
Co-founder and CEO
